PPHE Hotel Group (“PPHE”) can now confirm that following further investigation works at Park Plaza Leeds, PPHE have appointed a quantity surveyor to the project team, and are shortly issuing a tender for works involved in the replacement of the aluminium composite cladding system. The contractor is expected to be appointed by autumn 2018, and works will commence after a period of design, approvals and procurement. PPHE will be able to provide a further update in autumn 2018.

PPHE reiterates that the current interim measures remain sound as per the local authorities and it is committed to the safety and security of its guests and team members at all times, carrying out regular accredited Fire Risk Assessments in full compliance with the Fire Regulatory Reform Safety Act.

Further to the statement dated 27 March 2018, PPHE Hotel Group (“PPHE”) can confirm that preparations have progressed and further investigation works have been completed. Following these works, the group is near to completing the definition of the scope of works. Further to that, a shared timeline for all involved parties has been set to ensure efficient progression.

PPHE can confirm that they are in close collaboration with their appointed partners expecting to submit the project to tender by the end of June.

The group will be able to provide a further update towards 20 July 2018.

PPHE reiterates that the current interim measures remain sound and it is committed to the safety and security of its guests and team members at all times, carrying out regular accredited Fire Risk Assessments in full compliance with the Fire Regulatory Reform Safety Act.

Following recent events, the government body's Tower Casework Team has been set up to oversee the safety checks and testing of Aluminium Composition Material ("ACM") cladding samples by Building Research Establishment ("BRE"). As part of this, the Department for Communities and Local Government ("DCLG") has published guidance dated 22 June 2017 on the interim mitigating measures in the event of a failure.

PPHE Hotel Group ("PPHE") is committed to the safety of all its guests and team members, and the Group chose to proactively submit cladding samples to the BRE for testing of Park Plaza Leeds ("the Hotel"). PPHE has been informed that, similar to many other commercial properties in the UK, the sample of the ACM cladding at the Hotel has not passed the BRE tests.

In line with the Group's safety policy, the Group has subsequently had the Hotel inspected by the West Yorkshire Fire & Rescue Service. The inspection report required interim mitigating measures to be implemented, with which the Hotel has fully complied and which have subsequently been noted by the Tower Casework Team. The DCLG has issued further guidance to the public on 2 August 2017. Park Plaza is currently reviewing this with its independent facade engineering consultants but its current interim

measures remain sound.

PPHE carries out regular accredited Fire Risk Assessments in full compliance with the Fire Regulatory Reform Safety Act, and Park Plaza Leeds along with each managed and owned UK hotel has rigorous safety measures in place. These measures include emergency evacuation plans, sprinkler systems, smoke detectors, CCTV, team training and refresher training as well as on-going full hotel evacuation training. All the Group's hotels are manned 24 hours a day. The safety and security of our guests and team members remains our priority at all times and we will keep our guests updated should any operational or building changes need to be amended.
